### TOTAL

#### A success story in Texas

Total, the world's 4<sup>th</sup> largest oil and gas major, has built a wide economic footprint in Texas.

With U.S. headquarters in Houston, our teams have turned a small oil business established in 1956 into a fully-integrated energy player.

Our strong commitment to the U.S. energy renaissance has led us to invest over \$6.5 billion since 2015. Total secured significant participation in three major oil discoveries in the Gulf of Mexico where it resumed operatorship in 2018.

Onshore, our shale gas teams operate 100,000 barrels of oil equivalent per day near Dallas.

Total's rapidly-growing LNG business in Texas and Louisiana will make us the **second-largest U.S. LNG exporter by 2020**. Access to abundant natural gas also triggered major expansions to our Port Arthur refinery and Bayport polyethylene plant on the Gulf Coast, which will **generate thousands of jobs in Texas during construction**.

Total is present in Austin with 200 employees from our renewables affiliate SunPower, and our R&D teams have strong ties with Rice University, U.T. Austin and Texas A&M.

Our **7,000 U.S. employees work across 23 states** with a mission to bring affordable, reliable and clean energy to a growing population.

## ATOS

### A success story in Texas

Atos, a global leader in digital transformation, has a significant presence in the U.S. with more than 6,800 employees and revenue greater than \$2.45 billion USD. Over the past year, the company expanded its U.S. presence by focusing on high-growth markets such as cloud computing, Internet of Things and artificial intelligence.

Driving much of this industry-leading innovation is the recently opened Atos North America Regional Headquarters in the Dallas-Fort Worth metropolitan area. Atos employs more than **1,100 people in Texas**, with 650 of those positioned with the regional headquarters.

The facility reinforces one of company's key initiatives - Atos Digital Workplace - that allows employees to connect, communicate and collaborate in an efficient way. The new building offers an open environment with large workspaces, touchscreen interfaces, and wireless presentation tools.

The Dallas facility is also home to Atos' first **Business Technology and Innovation Center (BTIC)** in the U.S.

The Atos North America Regional Headquarters will facilitate seamless delivery of services to Atos American customers across multiple industries including healthcare, financial services, energy and utilities, manufacturing and retail. It is expected to help drive growth within the United States. The company has employees in 49 states and the District of Columbia.
